PROFESSIONAL SUMMARY

Full-Stack Web Developer and QA Tester with 4+ years of experience building responsive, production-ready web applications. Skilled in React, Next.js, Node.js, TypeScript, and MongoDB, with a strong focus on clean code, performance, and user experience. Proven record of identifying critical software bugs, migrating legacy systems, and architecting scalable platforms. Hands-on experience building RAG systems and AI agents. Founder of Tech And Teach Community, a pan-African tech learning group with 1,000+ members.

WORK EXPERIENCE

Software Developer & QA Tester | **KodeHauz Solutions Planet Limited** *Jun 2026 – Present*
Eket, Akwa Ibom (On-site)

- Onboarded onto two live products, Mentors Tower (frontend) and the KodeHauz website, gaining rapid familiarity with the codebases using Linear and Figma.
- Building and maintaining the KodeHauz website (Next.js, Tailwind) and client sites including CFEM and Vinto Subsea, turning Figma designs into pixel-perfect responsive UIs and working through pull request reviews.
- Identified and documented 3 critical UX bugs on the KodeCamp LMS within the first week, including login form load delays and misleading empty-state messages on Tasks and Curriculum pages.
- Conducted cross-device testing across PC and mobile, confirming platform-wide reproducibility of all reported bugs and sharing a professional bug report with the testing team.
- Work within an Agile/Scrum environment with daily standups and weekly policy reviews.

Fullstack Developer (Senior) | **Xynder** *Feb 2026 – Present*
Remote

- Contributing to Zealock Admin Dashboard as part of a collaborative dev team, building scalable component structures and translating Figma mockups into responsive, production-ready UIs.
- Solely developing a high-profile website for a Nigerian Senator using React, Vite, and JavaScript, tailored to public relations and accessibility requirements.
- Implemented automated email scheduling using setInterval with manual fallback triggers, failure detection, and a delay-display modal.
- Managed Git workflows including feature branching, code reviews, and pull requests within an Agile/Scrum sprint environment.

Fullstack Developer (Freelance) | **Syncgrass Limited** *Feb 2026 – Present*
Remote

- Spearheaded full migration of legacy static HTML website into a modern React application, improving UI, UX, and maintainability.
- Implemented dark/light mode toggle (CSS custom properties, prefers-color-scheme, localStorage), mega menu, scrolling marquees, and carousels.
- Optimised rendering and asset loading pipelines to improve page performance.

Fullstack Developer (Freelance) | **Independent** *May 2022 – Present*
Remote

- Designed and deployed NJLSwift, a multi-app logistics platform with Admin & Driver dashboards, JWT authentication, RBAC, Paystack integration, real-time Socket.IO updates, and CI/CD pipelines.
- Built NJL Splendour (Next.js/TypeScript e-commerce), NoteAngel (React note-taking app), AtmosphereNow (OpenWeatherMap real-time weather app), and Linked With Lucy (React link-in-bio page).
- Built a laundry pickup and delivery platform on Vendure headless e-commerce with a Next.js storefront (backend on Railway, storefront on Vercel) during a remote contract with TriveStack.
- Built and maintained scalable RESTful APIs with Node.js and MongoDB, integrating third-party services across multiple production projects.

KEY PROJECTS

NJLSwift Platform | *React · Node.js · MongoDB · Socket.IO · JWT · Paystack · Vercel · Render*

- Multi-app logistics platform with Admin & Driver dashboards, real-time data sync, JWT auth, RBAC, payment integration, and full CI/CD deployment.

City Energy Limited Website | *React · TypeScript · Vite*

- Built an eight-page website for a Nigerian power engineering company, with real project photos and a structured content layer.

NJL Splendour — E-Commerce | *TypeScript · React · Next.js · Tailwind CSS · Vercel*

- Luxury fashion storefront with responsive UI, product catalogue, and Next.js performance/SEO optimisation.

NoteAngel / AtmosphereNow / Linked With Lucy | *React · Tailwind · OpenWeatherMap API · Vite · Vercel*

- Suite of personal projects including a note-taking app, real-time weather app with live API integration, and a branded link-in-bio page.

Tech And Teach Community | *Community Building · Technical Mentorship*

- Founded and lead a pan-African Telegram tech community with 1,000+ active members across learning tracks and mentorship programmes.

TECHNICAL SKILLS

Languages:	JavaScript • TypeScript • HTML5 • CSS3
Frontend:	React • Next.js • Redux • Vite • Tailwind CSS • CSS Modules • Material UI
Backend:	Node.js • Express.js • RESTful APIs • Socket.IO • Vendure
Database & DevOps:	MongoDB • Git & GitHub • Vercel • Render • Railway • CI/CD
QA & Testing:	Manual Testing • Bug Documentation • Cross-device Testing • UX Auditing
AI Development:	RAG systems (ChromaDB, HuggingFace embeddings) • LLM tool-calling • LangChain / LangGraph agents • Mastra agents
Design & Tools:	Figma • Canva • Prompt Engineering • AI-assisted Development
Methodology:	Agile • Scrum • Sprint Planning • Code Reviews

EDUCATION

BSc Geography and Environmental Management — *Dec 2019 – Oct 2024*
University of Port Harcourt
Second Class Upper | *CGPA: 4.06 / 5.0*

Frontend Engineer — *May 2022*
Codecademy

Fullstack Web Developer — *Aug 2023 – Dec 2023*
Smarthub

CERTIFICATIONS

AI for Developers — KodeCamp 6.0 — *Aug 2026*
Certificate in React — Codecademy — *Feb 2025*
Certificate in Excel — Integral Computer Schools — *Aug 2023*
